TITLE: The rat dopamine D4 receptor: sequence, gene structure
TITLE: and demonstration of expression in the cardiovascular
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Sequence 7. Application US/08475742

Patent No. 6121015

Patent No. 6121015

GENERAL INFORMATION:

APPLICANT: O'Mallous

TITLE OF INVENTION: Gene Encoding the Rat Dopamine D4 Receptor

FILE REFERENCE: WU 102 CON DIV

CURRENT FILING DATE: 1995-06-07

EARLIER FILING DATE: 1995-06-16

EARLIER APPLICATION NUMBER: US 08/261,293

EARLIER APPLICATION NUMBER: US 08/014,013

EARLIER PILING DATE: 1993-01-28

NUMBER OF SEQ ID NOS: 16
